

deleo® the power

Urine scale & limescale remover

The bottle with the swan neck reaches everywhere

BENEFITS:

- The product: Powerful deleo® action removes urine scale and limescale. Use deleo® undiluted in sanitary facilities. Never use on chromium steel fittings! In building applications apply diluted in a ratio 1:10 or 2:10.
- Excellent results: deleo® is particularly suitable for sanitary facilities to reliably remove urine scale and limescale stains in toilet bowls and urinals flushed with water. In building applications it reliably removes limescale stains from tiles.
- Easy to use: deleo® is easy to use and thanks to the swan neck system it reaches everywhere.
- Kind to the waste water system: deleo® does not attack PVC, plastic, rubber, iron or lead materials in the waste water system.
- Prevention: Used regularly deleo® saves huge costs by ensuring there is no need for emergency calls to drain-cleaning companies. Bid farewell to technical problems and disruptions.
- Safe to use: deleo® the swan-neck bottle ensures safe and practical application. Please observe the safety data sheet!!

APPLICATION:

- Sanitary facilities: Apply deleo® undiluted; if necessary spread and clean using a brush or toilet brush. The urine scale or limescale stains are removed once the „bubbling reaction“ stops. If heavily crusted, repeat as required. Always wear gloves; rinse well after use. Be aware of rising vapours.
- Building cement: Dilute with 1 part deleo® to 2-5 parts water. Apply solution with a soft or hard brush; rub in to create a chemical reaction. Rinse with copious amounts of water and apply a protective oil film, if necessary.
- Floors: Dilute with 1 part deleo® to 7-10 parts water. Apply using a broom; allow to work for a short time and rinse with copious amounts of water.
- Dosage: the stated amounts are provided as a guideline.
- NEVER USE TOGETHER WITH OTHER CHEMICALS!
